Subject:

Hi Liz,

I think we got off to a good start yesterday with Tierra. Clearly our interests are different, but we're confident that working with Doug Sarno we'll be able to constitute a CAG and identify our priority. I was glad we left with the understanding that you would be our point person. As I recall, there were a number of things we would like to receive through you:

1. Creation and use of a list serve to advise us of documents received from Tierra on an ongoing basis;
2. Investigation of what would be involved in moving from the standard of TW 2 to TW1 for water returned to the Passaic after the dewatering process;
3. Summary profiles developed by Tierra for each of the three upland facility locations they are considering (plus and minus factors);
3. Copies of data and reports generated by PRC in fulfillment of their TAG commitment;
4. Any baseline information available on the current condition of existing River habitat in the immediate area of Diamond shamrock plant and;
5. Finally, any information/suggestion with regard to advancing the local hire agenda that is of interest to the community.

It's not that I think you don't have a full time job, Liz, it's just that when we asked for things in the past you seem to be able to put your finger on materials more quickly than most.

Thanks for your help. See you next week at City Hall.

Carol
